

PRESS RELEASE

February 22, 2024

Labscoop joins forces with baseclick GmbH to deliver cutting-edge click chemistry technology to bolster diagnostic, therapeutic, and vaccine research and development in the US.

Little Rock, AR - Labscoop is thrilled to announce the availability of baseclick GmbH products for our customers in the US and around the world. This strategic partnership opens the doors for laboratories and researchers to access Baseclick's extensive range of high-quality click chemistry reagents. Labscoop Marketplace now offers various kit systems for EdU-based cell proliferation assays, oligonucleotide modification, click-based FISH technologies, PCR-based diagnostic applications, and mRNA synthesis reagents to the US market through our collaboration with Baseclick. This strategic move reflects Labscoop Marketplace's dedication to innovation, quality, and customer success. The extended product line is now available for purchase on Labscoop Marketplace. We are pleased to offer these new products/services to our valued customers through the Labscoop Marketplace. "This expansion reflects our commitment to constantly improve and evolve to meet the changing needs of our customers." - Nazifa Hamidzada, Marketing Manager at Baseclick

"Labscoop welcomes baseclick GmbH and its portfolio of click chemistry reagents and various kit systems to our Marketplace. Baseclick's cutting-edge products are an ideal fit for our Marketplace and the team-centric experience we've created for our academic and commercial laboratory partners working on the latest in disease-targeting in cancer and tracking biological processes. We're excited to showcase the cutting-edge click chemistry technology developed by 2022 Nobel Prize for Chemistry by Prof. Dr. Carolyn Bertozzi, Prof. Dr. Morten Meldal, and Prof. Dr. Barry Sharpless." - Johann Vidanage, Director of Supplier Relations at Labscoop

About Labscoop

Labscoop is a technology company building team-centric Marketplace experiences for academic and commercial laboratories. Labs of all sizes from a wide range of industries and organizations utilize Labscoop to streamline ordering workflows and to drive cost savings.

About baseclick GmbH

Baseclick is a dynamic, professional ISO-certified company in Neuried (near Munich) offering a large portfolio of chemicals for nucleic acids modification and its own developed kit systems. Baseclick also offers services for mRNA and oligo production and modification for research and preclinical evaluation. Baseclick GmbH enables the bioconjugation of (bio)molecules for developing valuable applications such as diagnostics, therapeutics, and vaccines. Their mission is to pioneer and provide the best applications and reagents for nucleic acid labeling for the life science market.
