

Perovskite Precursor for Solar Cell Purified Lead(II) Iodide

Lead(II) Iodide [for Perovskite precursor] (99.99%, trace metal basis)

1g / 5g / 25g / 100g / 1kg [L0279]

Advantages

- PbI_2 [L0279] with extremely low water content for preparing a concentrated clear DMF solution.
- Fabricates efficient perovskite solar cell devices (PCE > 10%) with high reproducibility.

Comparison of an existing product and PbI_2 [L0279]
