

PRODUCT INFORMATION

Riboflavin 5'-monophosphate (sodium salt hydrate)

Item No. 18167

CAS Registry No.: 6184-17-4
Formal Name: riboflavin 5'-(dihydrogen phosphate), monosodium salt, dihydrate
Synonyms: Flavin mononucleotide, FMN, Vitamin B₂ phosphate
MF: C₁₇H₂₀N₄O₉P • Na [2H₂O]
FW: 514.4
Purity: ≥95%
UV/Vis.: λ_{max}: 223, 267, 373, 446 nm
Supplied as: A crystalline solid
Storage: -20°C
Stability: ≥2 years

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

Riboflavin 5'-monophosphate (FMN) (sodium salt hydrate) is supplied as a crystalline solid. Aqueous solutions of FMN (sodium salt hydrate) can be prepared by directly dissolving the crystalline solid in aqueous buffers. The solubility of FMN (sodium salt hydrate) in PBS, pH 7.2, is approximately 10 mg/ml. We do not recommend storing the aqueous solution for more than one day.

Description

FMN is a coenzyme that is tightly bound to enzymes catalyzing oxidation and reduction reactions in a variety of biosynthetic pathways.^{1,2} FMN also binds the FMN riboswitch (RFN element) on RNA to alter gene regulation.^{3,4} FMN is a substrate of FMN phosphohydrolases and is used to study their function.⁵

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
