DATASHEET

BIO

Product overview

Name	BIO
Cat No	HB1259
Alternative names	6-BIO; 6BIO
Biological action	Inhibitor
Purity	>98%
Description	Potent GSK-3 α / β inhibitor. Maintains ESC self-renewal and pluripotency.

Images

Biological Data

Biological description	Potent GSK-3 α / β inhibitor (IC_{50} = 5 nM). Exhibits reduced activity at CDK1/cyclin B, CDK2/cyclinA, CDK4/cyclin D1, CDK5/p35, MAPKK and PKC-subunit α (IC_{50} values are 0.32, 0.30, 10, 0.08, 10 and 12 μ M respectively). Induces β -catenin stabilisation and protects hippocampal neurons from A β oligomer damage. Also inhibits Tyr276/216 phosphorylation and reduces β -catenin phosphorylation. Cell permeable. Maintains embryonic stem cell self-renewal and pluripotency and displays proliferation enhancing properties.

Solubility & Handling

Storage instructions	+4 °C
Solubility overview	Soluble in DMSO (10mM) or ethanol (10mM)
Important	This product is for RESEARCH USE ONLY and is not intended for therapeutic or diagnostic use. Not for human or veterinary use.
