

30% BSA Solution in DPBS (Catalog# TBS8031)*For Cell Culture, Sterile-filtered, BioXtra***DESCRIPTION**

Bovine Serum Albumin (BSA) is a single polypeptide chain consisting of about 583 amino acid residues and no carbohydrates. At pH 5-7 it contains 17 intrachain disulfide bridges and 1 sulfhydryl group.

TBS8031 is a 30% BSA solution which is a convenient form for direct supplementation of serum-free media. BSA is broadly used as an additive to cell culture media, especially serum-free media. It provides a range of benefits including protection from oxidative damage and stabilization of other media components such as fatty acids and pyridoxal.

APPLICATION

It can be used for cell culture as a protein supplementation of serum-free media.

PACK SIZE

30 mL/bottle, Store at 2-8°C °C.

pH: 7.2 ± 0.2

Shelf-life: 2 years.

Research use only.
