CHEMISTRY

## Aromatic SF<sub>5</sub> Compounds

The pentafluorosulfanyl group  $(-SF_5)$  possesses much stronger electron-withdrawing character and higher lipophilicity than other fluorinated groups such as the trifluoromethyl group  $(-CF_3)$ . In addition, it has been reported that aromatic  $SF_5$  compounds show excellent thermal and chemical stability. These specific properties of the aromatic  $SF_5$ compounds have attracted considerable attention for application in various areas, such as pharmaceuticals, agrochemicals, and functional materials.
