Laboratory Procedures

1-Myristoyl-2-lauroyl-*rac*-glycerol is supplied as a solid. A stock solution may be made by dissolving the 1-myristoyl-2-lauroyl-*rac*-glycerol in the solvent of choice. 1-Myristoyl-2-lauroyl-*rac*-glycerol is soluble in organic solvents such as ethanol, DMSO, and dimethyl formamide, which should be purged with an inert gas. The solubility of 1-myristoyl-2-lauroyl-*rac*-glycerol in these solvents is approximately 30, 7, and 20 mg/ml, respectively.

Further dilutions of the stock solution into aqueous buffers or isotonic saline should be made prior to performing biological experiments. Ensure that the residual amount of organic solvent is insignificant, since organic solvents may have physiological effects at low concentrations. Organic solvent-free aqueous solutions of 1-myristoyl-2-lauroyl-*rac*-glycerol can be prepared by directly dissolving the solid in aqueous buffers. The solubility of 1-myristoyl-2-lauroyl-*rac*-glycerol in PBS, pH 7.2, is approximately 0.25 mg/ml. We do not recommend storing the aqueous solution for more than one day.
